In this thought-provoking webinar, **Trace Sheehan**, the writer and producer of the feature film **Food Evolution** and **Chris Vogliano, MS, RDN**, will examine some common points of contention when it comes to discussing food production and, in particular, GMOs. Trace will draw from his experiences while conceiving and making Food Evolution, while Chris will contribute his expertise as an RDN who specializes in the study of sustainable food systems and food waste reduction.

### Learning Objectives:

After completing this continuing education course, nutrition professionals should be able to:

1. List the basic characteristics of genetically modified organisms (GMOs) and differentiate GMOs from conventionally bred foods.
2. Identify three of the most common examples of GMOs in the modern food supply.
3. Discuss three of the common points of contention within the public debate surrounding GMOs.
4. Employ effective listening and communication strategies when participating in a controversial discussion relating to food production.
